**NOTES:**

- Base calculation date is 4th yr of Solomon, about 966 BC, which should be within 1 to 2 years of the actual date.
- Years BC and Abs are usually within 1-2 years of actual.
- LXX and SamPent dates differ from MT. See separate layouts.
- Genesis 5 and 11 are primary sources of pre-Abrahamic dates.
- Dates of Job's life are calculated from: age 30-35 when married; about 30-50 years (or more) for 10 children; youngest child 20-30; plus time to become established. Thus, 230-240 year life span, which fits the demographics between Babel and Abraham.

Death Adam

Birth Noah

123 yrs Adam to Noah

- Noah lived 350 years; Abraham, and Shem lived the birth of Jacob. This is the Flood up to a time less
- The birth year of Ham, Japheth and Shem (Genesis 5:32) and 50
- When Terah died Hkaran to Canaan. Th
